#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37.CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 38-60 and 73-81, drawn to a method of inhibiting cartilage damage comprising the delivery of a composition locally to the joint, classified in class 424, subclass 422.
  - II. Claims 61-72, drawn to a method of inhibiting cartilage damage comprising the delivery of a composition locally to a joint during varying stages of an operation, classified in class 424, subclass 423.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions The inventive method of group II requires an arthroscopic surgical procedure while the method of group I requires no such procedure. The invention of group I can be applied at any time while the invention of group II requires further procedures including arthroscopic surgery.
3. This application contains claims directed to the following patentably distinct species of the claimed invention:
  - a. The delivery vehicle: applicant must choose between
    - i. Microparticles, microspheres, nanoparticles,

- ii. Proteins,
- iii. Liposomes
- iv. Carbohydrate
- v. Synthetic organic compounds
- vi. Inorganic compounds
- b. The delivery mechanism: applicant must choose between
  - vii. Injection
  - viii. Infusion
  - ix. Regulated delivery pump
- c. The anabolic chondroprotective agents: applicant must choose
  - x. Interleukin
  - xi. Transforming growth factor
  - xii. Fibroblast growth factor
- d. The inhibitor of catabolic activity: applicant must choose between
  - xiii. IL-1 receptor
  - xiv. TNF-alpha receptor
  - xv. Cyclooxygenase-2
  - xvi. MAP kinase receptor
  - xvii. Nitric oxide synthase receptor
  - xviii. Nuclear factor kB inhibitor

Art Unit: 1615

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 38 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
